ABSTRACT

This study, the tenth in a series, presents college language registration and student contact hour data for all modern and classical language programs in the United States. The body of the report consists of 24 tables summarizing the data, and a directory of the 2,353 institutions that reported registrations in one or more foreign languages. Summer school data for 1971 programs are also provided. To facilitate the study of trends in foreign language registrations over the 10-year period between 1960 and 1970, registration data from the surveys undertaken in 1960, 1965, and 1968 have been incorporated into this report. An institutional directory is provided. A section on foreign language registrations in institutions of higher education by state and institution for fall 1970 is appended with a sample report form used in the survey. Tables and data are discussed in the introductory section. (RL)

ABSTRACT

Brod, Richard I.

Survey of Foreign Language Course Registrations and Student Contact Hours in Institutions of Higher Education, Fall 1970 and Summer 1971.

March 1972, 155 pp.

Modern Language Association of America, 62 Fifth Avenue, New York, N.Y. 10011.

U.S. Office of Education, Institute of International Studies, Project No. 0-7749, Contract No. OEC-0-70-3988(823).

This report is based on a questionnaire survey of all two-year and four-year colleges in the United States listed in the 1970-71 Education Directory (Part 3, Higher Education). Registrars at 2,538 institutions replied to the questionnaire; 2,353 reported registrations in one or more foreign languages.

The Fall 1970 survey shows a decline of 1.4% in total foreign language registrations between 1968, the year of the last previous investigation conducted by the MLA, and 1970. Registrations declined in French, German, Russian, Latin, and Ancient Greek, but increased in Spanish, Italian, and a number of the so-called "other" or less commonly taught languages. Spanish is now for the first time the leading language in U.S. colleges, having displaced French from this position.

The totals for Summer 1971 show a decline of 2.9% from the overall total of foreign language registrations recorded in the Summer of 1969.

The report consists of an introduction, twenty-four tables, and an institutional directory. The tables present summary data, by region and state, for the seven most commonly taught languages and for the aggregate of "other" languages, as well as detailed comparative figures from surveys undertaken in 1960, 1965, and 1968.

FOREWORD

The present study of college language registrations is the tenth in a series that the Modern Language Association has conducted under contract with the United States Office of Education. It is the third to present data for all foreign languages, both classical and modern, in colleges and universities in the United States. The body of the report consists of twenty-four tables summarizing the data, plus a directory of the 2,353 institutions that reported registrations in one or more foreign languages. Like the previous report, it includes summer school data (see tables 18-24) for courses taught in Summer 1971.

To facilitate the study of trends in foreign language registrations over the ten year period between 1960 and 1970, registration data from the surveys undertaken in 1960, 1965, and 1968 have been incorporated into the present report (see tables 4-13). The comparative figures are drawn from the following reports: "Modern Foreign Language Teaching in Junior Colleges, Fall 1959 and Fall 1960"; "Modern Foreign Language Enrollments in (1206 four-year) Colleges and Universities, Fall 1960"; "Foreign Language Enrollments in Institutions of Higher Education, Fall 1965"; and "Foreign Language Registrations and Student Contact Hours in Institutions of Higher Education, Fall 1968 and Summer 1969."

It should be borne in mind, in consulting the comparative figures, that those for each year are derived from a different base, ranging from 1,661 institutions in 1960 to 2,353 in fall 1970.

As in the 1968 survey, information on student contact hours was requested from college registrars together with the figures on the number of registrations in each language. Due to limitations of space, however, data on aggregate contact hours have not been included in the present report. Instead, the average number of contact hours per student per week has been computed for the aggregate of registrations in all languages in each state; these figures are reported in tables 1-3, for fall 1970, and 18-20, for summer 1971.

The data for the present report were compiled and tabulated by an able staff of research assistants. Senior Assistant Jeffrey H. Meyerson worked on the project from inception to conclusion; Cynthia Hartl, Christopher Goulding, and Carol Avins assisted for various periods throughout the duration of the project.

The staff is grateful to Dr. Kenneth Mildenberger, Deputy Executive Secretary of the Modern Language Association, for continuous advice and guidance, and to Mrs. Julia A. Petrov of the U.S. Office of Education for her helpful cooperation and responsiveness to special requests. To Dr. Glen D. Willbern, former Director of Statistical Studies and Secretary for Membership of the Modern Language Association, we owe special thanks for much encouragement and expert counsel at all stages of the project.

Finally, we acknowledge with thanks the splendid cooperation of the college registrars who supplied the data upon which the report is based.

Richard I. Brod
Research Project Manager

FOREIGN LANGUAGE REGISTRATIONS IN INSTITUTIONS OF HIGHER EDUCATION, FALL 1970

The basic data for this report were obtained from a questionnaire sent to the registrars of the 2,572 two-year and four-year institutions listed in the MLA's computerized files, plus an additional roster of institutions--largely seminaries--taken from the 1970-71 edition of the Educational Directory (Part 3, Higher Education) published annually by the Office of Education. Of the 2,538 institutions replying to the questionnaire, 2,353, or 92.3%, reported registrations in one or more foreign languages. In the last previous full-coverage survey, that of Fall 1968, 2,599 institutions were canvassed and 2,479 replies were received. Of these replies, 2,149, or 86.7% of the total completing the questionnaire reported registrations in foreign languages.

The 1970 survey is the first in the series of college enrollment surveys to show an overall decline in foreign language registrations: about 1.4% since the last report in 1968. This abrupt reversal of the growth trend enjoyed by foreign languages throughout the sixties is especially serious in the light of continued, steady growth of college enrollments in general, since it suggests that the role played by foreign languages in the U.S. college curriculum is diminishing even more rapidly than the absolute number of students taking language courses. In this sense, the decline in foreign languages at the college level actually goes back to the mid-sixties, when the rate of growth of enrollments in foreign languages first began to lag behind the growth rate of total college enrollments. Table A compares total college enrollments (as reported by the Office of Education) with the MLA's figures for modern foreign languages, giving a percentage ratio for each of the five years in which the MLA conducted its survey.

Table B shows the national totals of the 1970 survey of foreign language registrations, with a breakdown by language (the seven most commonly taught languages plus an aggregate figure for the "other" languages), tallies for junior colleges and graduate institutions, comparative totals from the 1968 survey, and a figure showing percent change in the language totals between 1968 and 1970. As the table reveals, the general decline in enrollments was not uniform in all languages and segments of the higher education community. Thus, Spanish, Italian, and a number of the "other" or less commonly taught languages (especially Hebrew, Japanese, Chinese, and Swahili) continued to enjoy good growth at the same time that enrollments in French and German were beginning to decline; figures in Russian, Latin, and Ancient Greek maintained the downward trend they had begun to manifest in the sixties. While registrations in four-year colleges and universities declined by 3.9%, the rapid growth of registrations in the junior colleges continued unimpeded, though not at the rate prevalent in the early and mid-sixties (18.0% between 1968 and 1970, compared with 47.2% between 1960 and 1963).

Distribution of Registrations

Five languages--French, German, Italian, Russian, and Spanish--accounted for 91.9% of the total registrations in foreign languages in the 2,353 colleges and universities covered in the survey; Latin and Ancient Greek accounted for an additional 4.0%; and the remaining 4.1% were distributed among 106 additional languages, ancient and modern. Since prior to 1965 the MLA did not collect registration data for Latin and Greek, general and specific growth trends in the decade of the sixties are more clearly evident in the figures for the five most commonly taught languages.

Spanish is now the most widely taught foreign language in colleges and universities, as it has been in secondary schools for many years. Spanish has displaced French from the leadership position it occupied in colleges until 1968. French is still the leading language in registrations in 23 states and the District of Columbia; Spanish holds first rank in 24 states, German in two (Alaska and North Dakota), and Japanese in one (Hawaii).

Spanish now accounts for 38.1% of the total registrations in the five leading modern languages. In 1960, Spanish had only 30% of the total, and French had 38.4%. Table C, based on the national registration figures for the five leading languages, shows the percentage of the total in each language in 1960, 1965, 1968, and 1970.

Table D depicts growth trends in the five leading modern languages between 1960 and 1970. It shows that except for some fluctuation in Russian between 1965 and 1968, the rate of growth for all the leading languages has declined steadily since the initial period of strong growth in the early 1960's, although no decline in actual total enrollments was recorded until the present survey.

Foreign Languages in the Junior Colleges

As junior and community colleges in the United States continue to grow in size and number, they become increasingly significant as centers of foreign language instruction. In 1960, 455 two-year colleges reported foreign language registrations; by 1970 the number had grown to 861. In the same period their language registration increased to nearly three times the 1960 figure, and their share of the total college registration in foreign languages increased from one in twelve to one in seven. Spanish is the leading language in the junior colleges, accounting for 50.4% of the registrations in the five leading modern languages in 1970. French is in second place with 30.1% of the total, and German is third with 15.4%.

Russian, Latin, Greek, and "Other" Languages

The most alarming figures in the 1970 survey report are those showing a decline of 11.1% in registrations in Russian, 13.4% in Greek, and 21.1% in Latin. Enrollments in Russian, after a period of uneven growth in the early sixties, had reached a level of over 40,000 enrollments in 1968, but this trend has now reversed itself, and Russian is in danger of losing its place as fourth leading language to Italian. The figures for Latin and Greek reveal an intensification of the downward trend that these languages have experienced since the 1960's, not only on the college level, but to an even greater extent in the secondary schools.

The growth rate among the so-called "other" or less commonly taught languages continues to be quite encouraging, however. In the aggregate, they grew 39.4% between 1968 and 1970, and several of them, most notably Hebrew, Japanese, and Swahili, grew at even faster rates during this period. Since registrations for Hebrew now exceed those for Ancient Greek, future MLA reports may have to list Hebrew separately from the remaining "other" languages. No distinction can be made between Ancient and Modern Hebrew, however, since normally none is made by the reporting institutions. Table E shows enrollment trends in the nine most widely taught of these languages.

FOREIGN LANGUAGE REGISTRATIONS IN INSTITUTIONS OF HIGHER EDUCATION, SUMMER 1971

Prior to its 1968-69 survey, the Modern Language Association covered foreign language registrations in the fall term only. The first summer survey, taken in 1969, tabulated a total of 141,763 registrations reported by 879 institutions. In 1971, reports were requested from the registrars and directors of summer sessions at all colleges and universities which had not expressly indicated on the fall survey questionnaire that they did not offer summer courses in foreign languages.

Reports received from 1,009 institutions in Summer 1971 yielded a total of 137,615 registrations in foreign language courses, or 2.9% fewer than were reported in 1969. Table F below summarizes the results of the 1971 survey, with comparative figures for 1969. Summer registration data are presented in detail in Tables 18-24 in the body of the report.

APPENDIX II.

REPORT FORM USED FOR THE SURVEY

THE MODERN LANGUAGE ASSOCIATION OF AMERICA

62 Fifth Avenue, New York, N. Y. 10011 • Tel: (212) 691-3200 (Ex. 726)

SURVEY OF FOREIGN LANGUAGE COURSE REGISTRATIONS AND STUDENT CONTACT HOURS IN U. S. INSTITUTIONS OF HIGHER EDUCATION, FALL 1970.

TO THE REGISTRAR:

The Modern Language Association is continuing its series of studies on the status of foreign languages in the colleges and universities of the United States.

The published report on the results of this survey will include a directory with a record of course registrations and student contact hours in each foreign language taught, institution by institution. Language trends will be charted for the period 1960-70.

We believe that the simple card form will enable you to report the data for your institution with a minimum of time and effort.

Note that registration figures and student contact hours are requested for all foreign languages, ancient as well as modern.

We are grateful for the cooperation that the Modern Language Association has received from college registrars in past surveys. We hope that your institution will participate, through you, in the present national study.

INSTRUCTIONS

1. Separately for undergraduate and graduate levels, report Fall 1970 registrations and student contact hours for all foreign language courses that carry credit. (Student contact hours are computed by multiplying the number of individual registrations in each course by the actual number of hours the student attends the course in a given week.)

2. Include all students who are taking the given courses for credit, even though some of the students may not intend to take degrees. Such students may be enrolled on the main campus, a branch campus, or an extension center, in day, evening, or Saturday classes. **Do not count auditors.**

3. A student enrolled in more than one language course should be included in the total course registration of each, whether the courses are in the same language or in different languages.

4. Please complete the form below and mail it as soon as possible. No postage is required.

(Even if your institution has no foreign language registrations in Fall 1970, please return the form with your signature.)

FL Course Registration and Student Contact Hours in U.S. Institutions of Higher Education, Fall 1970.

Registrations and student contact hours in courses primarily for UNDERGRADUATES:

Language	No. of registrations	No. of student contact hours
French
